

SPRING 2023

We exist to make every stride better

1 POSTURE: Focus on standing tall, head up, looking forward and relaxing your body.

2 POSITION: The ideal position to maintain while you're running is similar to a marching gait. Stand tall with your knees, hips and ankles softened and your shoulders and arms relaxed. March in place and let your heels settle fully on the ground below you as you plant them.

3 CADENCE: Run in place, with your feet landing as close to your body as possible. Land relaxed and use your whole foot. Stay between 170 and 190 steps/minute for most running speeds.

Newton 360
Sustainability

Newton shoes are crafted with a new formulation of extremely durable recycled materials and Ecopure™ to help reduce the amount of waste and plastics in our environment. An average shoe can take over 40 years to biodegrade, our shoes are specially treated to break down into nontoxic biomass & biogas up to 75% quicker in landfills while not compromising quality or performance in any way. Run these shoes into the ground, Mother Earth will thank you for it.

Newton is a member
of the United Nations
Global Compact.

Newton's office and
warehouse is powered
100% by wind.

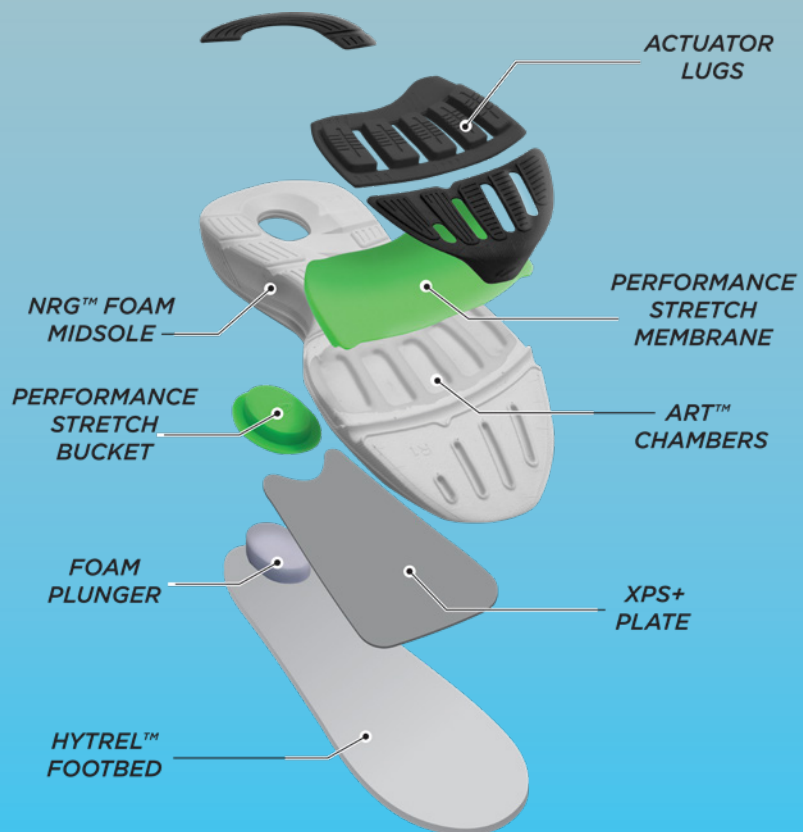

All Newton products
are vegan.

Newton recycles
and/or composts
95% of its waste.

THE TECH

Exploded View of Sole Construction

ART™ TECH

The cornerstone of Newton since day one; the patented ART Technology™ is powered by the active movement of the lugs and uses layers of next-gen elastomers to create a hyper-responsive but accessible ride you won't find with any other shoe.

XPS+™ PLATE

Our new 3/4 length plate crafted from the high performance PA-11 (Polyamide) pairs with our ART Technology™ and NRG™ Foam to reduce impact while amplifying responsiveness. The XPS+ Plate helps smooth the transition from foot strike into forward propulsion and enhance fluidity.

NRG™ FOAM

Newton's proprietary chemically charged foam possesses 35%+ more rebound than EVA foams while maintaining optimal durability and responsiveness to help runners of all types go further, faster and farther with less energy expended.

HYTREL® FOAM

A Dupont innovation often regarded as the next great super foam for possessing over 51% greater rebound than standard foams. Hytrel has been the backbone of Newton's ART technology since 2008 as the principal material our membrane is made from.

GENDER TUNING

Our models are universally tuned for fit, and many have specific features to adjust for factors such as impact and weight differentials to ensure that our shoes are tuned uniquely for the runner to reach their best.

\$165.00

SPECS:

SIZES	5-12
WEIGHT	6.6 OZ
DROP	2.0 MM

SPEED TRAINER

The Distance is our acclaimed speed trainer, lightweight and designed for the higher cadence runner for speed training in middle to marathon distance. With a midsole constructed of NRG & Hytrel foams, and a performance sculpted XPS plate and ART package it's a responsive, fast and durable option that encourages optimal form to help the performance orientated runner to make the most of every stride.

TECH

- NRG™ Foam Midsole
- Hytrel® Foam Footbed
- XPS Performance Plate
- High Performance Action Reaction Technology™
- Gender tuned fit
